

# New York Metro

Home to the Equinix Financial Exchange

Our New York data centers feature a high concentration of customers in the financial sector for cloud providers targeting financial customers (e.g., data analytics providers) and a dense concentration of ad-tech companies directly connecting on Equinix's Ad-IX® advertising exchange. All Equinix customers can interconnect directly to customers and partners in their digital supply chain.

The New York colocation facilities enable customers to be part of a rich industry ecosystem. Our New York data centers are located in Newark (NY1), Bergen (NY7), Manhattan (NY8 and NY9), Secaucus (NY2, NY4, NY5, NY6), Carteret (NY11) and Elmsford (NY13). The Secaucus campus provides access to the rich ecosystems in New York Carrier Hotels via Fiber cross connect. Together, the New York metro supports many of the world's largest companies including financial services and media firms.

To learn more about interconnection opportunities in New York, visit the Explorer feature within [Equinix Marketplace](#).

EQUINIX

## Equinix value by vertical

### For network service providers

- Generate new revenue with direct connect opportunities through a number of cloud and content providers
- Access to Microsoft Azure ExpressRoute via Equinix Fabric™
- Access to dark fiber cross connects in New York's Carrier Hotels ecosystem

### For enterprises

- Performance Hub® to enable next-generation wide area network (WAN) architecture for a secure and highly reliable connectivity
- Equinix Professional Services and partners help facilitate deployments into a data center
- On-demand and direct access to Microsoft Azure, Office 365 and multiple cloud providers and networks via Equinix Fabric

### For cloud and IT service providers

- Ability to connect to 845+ customers, partners, content providers, networks and internet service providers
- Equinix Fabric allows providers to quickly and easily offer direct cloud access globally

### For content and digital media

- Equinix's network and interconnection will help with latency and jitter, thereby increasing performance and reliability
- Direct access to top content delivery networks like Limelight Networks, Akamai Technologies and Fastly, Inc.

### For financial services

- Low-latency connectivity to DirectEdge, CBOE, ICAP, Knight Capital, ISE and BOX
- Access to a rich array of service providers like Activ Financial and Bloomberg
- With Equinix Fabric, enable private, secure connections to cloud and payment partners and integrate payment systems
