

# SEVILLE METRO

## MOST-CONNECTED FACILITY IN THE REGION AND A CRITICAL LINK WITHIN THE LOCAL IT COMMUNITY

As digital transformation drives the distribution of services and controls closer to customers, employees, partners and ecosystems, the Iberian Peninsula is fast becoming an essential hub on the global connectivity map. This is due to its physical location between Africa, Mediterranean Europe and Northern Europe, and its strong cultural connection to Latin America.

Spain represents a large domestic market with more than 46 million consumers and a world-class infrastructure. Seville is the fourth-largest city in Spain and an important commerce center in the southern part of the country.

Our Seville (SA1) International Business Exchange™ (IBX®) data center is a business hub that enables businesses to build a digital edge alongside the largest industry ecosystems on Platform Equinix®. Serving as a critical link within the local IT community, SA1 is connected to the Canalink cable, with access to Morocco and the Canary islands.

Equinix can accommodate deployments from single cabinets to large, multi-megawatt installations. We also offer flexible configurations and power densities with resilient power supplies to ensure guaranteed uptime.

### Equinix Seville data center

The Equinix SA1 data center consists of one building with 3,000+ square feet (300+ square meters) of colocation space. Powered by 100% renewable energy, this premium facility offers scalable technical space and fully redundant power supplies that deliver leading operational resiliency and world-class security.

### Why Equinix

- Interconnect with the largest industry ecosystems
- Optimize communications and exchange data with enterprises, content providers, and cloud, network and internet service providers
- Leverage Performance Hub™ to enable next-generation wide area network (WAN) architecture for secure and highly reliable connectivity to network, cloud and IT service providers
- Provide cloud and internet services quickly and easily to Equinix-deployed customers
- Interconnect with top content and digital media (CDM) companies to reduce latency and help improve user experience
- Certified to meet rigorous environmental and energy management standards
