

EQUINIX AND ORACLE

ACCELERATING DIGITAL BUSINESS PERFORMANCE

Equinix and Oracle keep data private, ensure security imperatives and interconnect enterprise with cloud and IT partners globally

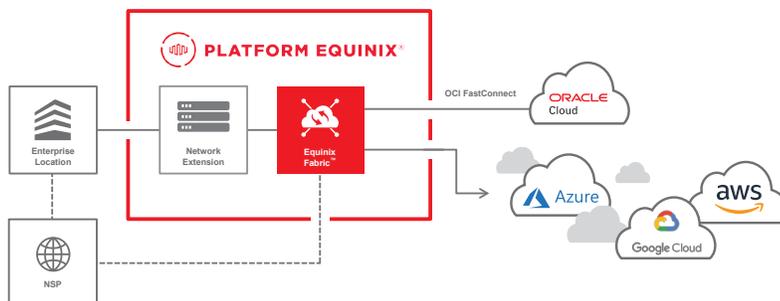

In today's ever-changing world, the need for digital transformation and managing data centers can be a costly and complicated activity for any enterprise. Whether you're looking for the right solution for your company's IT environment or developing your cloud strategy, you will need to consider several things: how to reduce cost, increase performance, ensure maximum availability of mission-critical workloads and gain cloud agility.

Solution

The strong partnership of Equinix and Oracle provides our customers exceptional cloud connectivity on a global platform. As the first and largest Oracle Cloud Infrastructure (OCI) FastConnect partner, Equinix has significant experience connecting hundreds of Oracle customers. With OCI FastConnect and Equinix Fabric™, you can easily and securely migrate and operate your workloads on OCI.

Many companies are also looking for business partners that maintain a sustainable environment. At Equinix, we design, build and operate our data centers with clean and renewable energy for our global platform.

Direct Connection to Oracle Cloud Infrastructure

About Oracle Cloud

Oracle Cloud is the industry's broadest and most integrated public cloud, offering best-in-class services across software as a service (SaaS), platform as a service (PaaS), and infrastructure as a service (IaaS). Helping organizations drive innovation and business transformation by increasing business agility, lowering costs, and reducing IT complexity, Oracle Cloud delivers nearly 1,000 SaaS applications and 50 enterprise-class PaaS and IaaS services to customers in more than 195 countries around the world, and supports 55 billion transactions each day.

EQUINIX

A Joint Solution for Cloud Adjacent Databases

For customers that cannot place their database in a public cloud, Equinix and Oracle offer a joint solution for Oracle Exadata Database Machine or Exadata Cloud@Customer. With this solution, enterprises can connect their database securely, with low latency and high performance, to the cloud data centers where their apps reside, all while maintaining secure control of their data.

Features

Superior quality

Better than the public internet or VPN, with high performance, low latency and secure connectivity.

Cost-efficiency

Lower costs than MPLS circuits. Pay only for what you use, without restrictive contract terms or a lengthy procurement process.

Fast, easy deployment

Quickly create connections to top cloud, network and security providers, or between your Equinix data centers in minutes via self-service portal or APIs.

Benefits

Maximum uptime

Equinix is the best place to operate Oracle Exadata with superior physical security and world-class reliability of >99.9999% uptime, while reducing your on-prem data center footprint.

High performance

Exadata is the only hardware engineered with the Oracle Database. Lower costs: run more workloads on less hardware.

Cloud connectivity

With Equinix Fabric, you get high-performance connectivity from your database to apps in the public clouds.

Enhanced security

Bypass the internet with direct Equinix Fabric connectivity to public clouds, reducing security concerns.

Industry and corporate standards

Meet data sovereignty and industry compliance standards while helping meet corporate IT cloud mandates.

Our Environmental Commitments

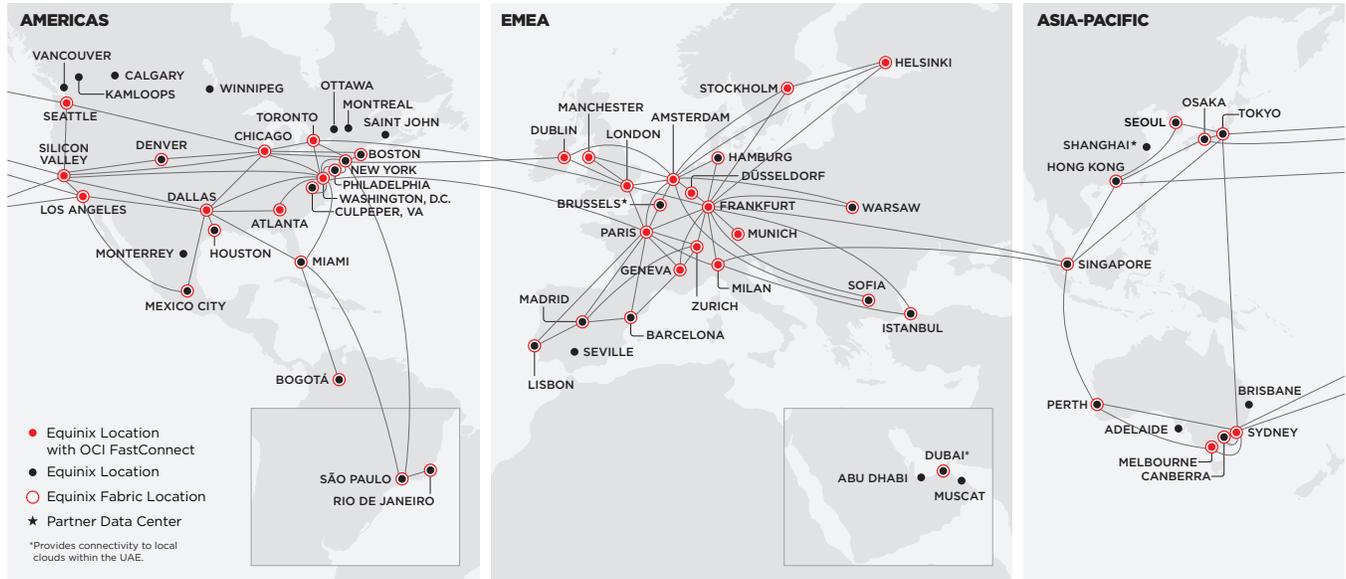

Our environmental efforts deliver meaningful and measurable progress against sustainability goals that positively impact our customers, partners, investors and employees. We also understand the urgency of global climate change as a threat and risk to not only our business but the entire world. Our commitments include:

- Reaching our long-term goal of 100% clean and renewable energy across our global portfolio.
- Deploying best-in-class data center energy efficiency technologies and innovations for the reduction of energy consumption around the world including retrofits, new builds and working with landlords where possible.
- Responding to the threat of global climate change and uncertain regulatory paradigms by managing our global carbon footprint.
- Accepting responsibility for our proportional share of GHG emissions and the need for urgent reduction.
- Building and maintaining healthy sustainable office settings to promote responsible living across our office portfolio.
