

WARSAW METRO

Offering unrivalled connectivity to Central and Eastern European financial centers

Warsaw occupies a pivotal European gateway location between east and west. As the capital city of eastern Europe's second-largest economy, Warsaw is a popular regional HQ location for large multi-national corporations. Our two Warsaw **International Business Exchange™ (IBX®)** data centers are located in prime strategic locations, offering direct fiber connections to major telecommunications carriers and a growing number of leading enterprises (services, retail, trade, banking) throughout Poland—360+ companies in total. Our IBX colocation facilities enable customers to connect to one of Europe's most established industrial ecosystems, within a mature yet rapidly developing market. In fact, our primary Warsaw location is the most densely connected data center in Poland.

Customers can choose from a broad range of interconnection options offered by 205+ local and international network service providers and 70+ cloud service providers. There are direct connections to the PLIX (Polish Internet Exchange), and the exchange is housed within our facilities. In addition, the PLIX is owned and operated by Equinix, meaning that our Warsaw customers benefit from unrivalled connectivity and minimized latency.

Warsaw metro facilities

The Warsaw IBX data centers are situated in key strategic locations in proximity to the city center and Warsaw Chopin airport. Our two facilities offer 20,000+ square feet (1,875+ square meters) of combined colocation space. They feature ample scope for multi-site solutions, scalable technical space and fully redundant power supplies to ensure operational resiliency and world-class security.

Equinix Warsaw (WA2) IBX data center

The value of interconnection

- Interconnect with 360+ of the world's leading organizations located in Poland
- Optimize communications and exchange data with enterprises, content providers, and cloud, network and internet service providers
- Leverage **Performance Hub™** to enable next-generation wide area network (WAN) architecture for secure and highly reliable connectivity to 205+ network service providers and 70+ **cloud and IT service providers**
- Connect to the largest internet exchange in Poland, owned, operated and hosted by Equinix
- Provide cloud and internet services quickly and easily to Equinix-deployed customers
- Maximize the use of digital channels with access to the main media hubs in Warsaw
- Interconnect with top **content delivery networks (CDNs)** to reduce latency and help improve user experience
- Easily meet compliance requirements, now and in the future. Our Warsaw IBX data centers are highly accredited, including ISO 9001 certification
